SOLUTION

Exercise 3

For each sentence, check either the TRUE or the FALSE box.

In a USB pendrive of 64 Gigabytes, you can store
TRUE ☒   FALSE ☐   5 films in good quality
TRUE ☒   FALSE ☐   100 images in good resolution
TRUE ☒   FALSE ☐   the text of a 2,000 pages book

SSD
TRUE ☐   FALSE ☒   is a USB pendrive
TRUE ☒   FALSE ☐   means Solid State Disk
TRUE ☐   FALSE ☒   can contain up to 1 Terabyte
TRUE ☒   FALSE ☐   is faster than an hard disk of the same size
TRUE ☐   FALSE ☒   is cheaper than an hard disk of the same size

Windows Seven Home Premium
TRUE ☐   FALSE ☒   appeared on the market <u>before</u> Windows Vista
TRUE ☐   FALSE ☒   is private software
TRUE ☒   FALSE ☐   is software
TRUE ☐   FALSE ☒   is better than Windows Seven Professional

Double-clicking on link XYZ to Word file ABC
TRUE ☒   FALSE ☐   runs Word which opens ABC
TRUE ☐   FALSE ☒   opens the directory where XYZ is contained
TRUE ☐   FALSE ☒   opens the directory where ABC is contained

John opens a file with Word and then Mary opens the same file with Word
TRUE ☐   FALSE ☒   John will not be able to save the file in a modified version
TRUE ☐   FALSE ☒   Mary will not be able to open the file
TRUE ☐   FALSE ☒   Mary will not be able to save the file in another directory

This is a browser
TRUE ☒   FALSE ☐   Safari
TRUE ☒   FALSE ☐   Chrome
TRUE ☒   FALSE ☐   Firefox

Using a <u>SMTP</u> connection through UNIBZ mailserver
TRUE ☒   FALSE ☐   you need to authenticate
TRUE ☐   FALSE ☒   you need to be connected from inside UNIBZ network
TRUE ☒   FALSE ☐   you can use it to <u>send</u> emails
TRUE ☒   FALSE ☐   you can use it to <u>send</u> an email to a recipient inside UNIBZ network

WiMax
TRUE ☐   FALSE ☒   is a wireless connection limited to 100 meters
TRUE ☒   FALSE ☐   is faster than GPRS
TRUE ☒   FALSE ☐   is a technology to overcome digital divide
TRUE ☐   FALSE ☒   is a technology which offers a minimum band guaranteed

Prof. Paolo Coletti   School of Economics and Management
                                                       Free University of Bolzano Bozen

Decrypting

TRUE ☐	FALSE ☒	can be used to protect files
TRUE ☐	FALSE ☒	means changing a text to make it unreadable without a key
TRUE ☐	FALSE ☒	can be done with the <u>en</u>cryption key

Antivirus program

TRUE ☐	FALSE ☒	protects the computer from spam
TRUE ☐	FALSE ☒	uses black lists of IP numbers
TRUE ☐	FALSE ☒	prevents data interception

RAID 10

TRUE ☒	FALSE ☐	prevents data loss in case one hard disk crashes
TRUE ☒	FALSE ☐	is faster than using a single hard disk
TRUE ☒	FALSE ☐	requires 4 hard disks
TRUE ☐	FALSE ☒	prevents data loss in case the user wrongly deletes a file
TRUE ☐	FALSE ☒	prevents data loss in case the user wrongly modifies a file
TRUE ☐	FALSE ☒	prevents data loss in case a virus attacks the computer
